**Nitrous Oxide** - “Nitrous oxide is a gas with several legitimate uses, but when inhaled it can make people feel euphoric and relaxed. This happy feeling has led to it being nicknamed ‘laughing gas’. Some people also experience hallucinations. However, there is a risk of death as a lack of oxygen can occur when using nitrous oxide. This risk is likely to be greater if the gas is consumed in an enclosed space or if a substantial amount is rapidly used. Although nitrous oxide has been legal in the past, since the Psychoactive Substances Act came into effect on 26 May 2016, it is now illegal to supply or import nitrous oxide for human consumption”.
